## SUMMARY

A Cyber Security enthusiast with beginner skills and the hunger to continue growing. A proven leader in load management with multiple works progressing simultaneously.

---

## TECHNOLOGIES

**Languages:** Java, Python

**Practices:** Cyber Security, DSA, Digital Marketing

**Tools/Other:** Git, GitHub, Linux, IoT, Security, Digital Marketing

---

## PROJECTS

### NETHERWORLD -

- Developed an advanced portscanner for information gathering.
- Used PyQt6 for GUI design and json for API integration.
- Proven useful as it integrates multiple information gathering tools and helps in performing multiple tool function on a single app such as GEOlocation tracker, os information, portscanning, etc..

### Redstrike -

- An intermediate cyber security tool for both offensive and defensive security.
  - Implemented functions like port scanning features, password cracking by brute force, etc..
  - Simple and easy to use.
  - Currently under progress so only cli is available at the moment.
- 

## EDUCATION

**KR Mangalam University, MCA**

*2025 – 2027*

**Trinity Institute University, BCA**

*2022 – 2025*

**Pragati Public School, Class 12**

*2021 – 2022*

---

## ACHIEVEMENTS

- Organized CTF (Capture the Flag)
-
